

Non-Discrimination Policy

ERC Broadband (“ERC”) provides Internet services to its customers in an open, non-discriminatory manner. Any ERC customer is eligible to connect at reasonable rates and terms. ERC uses multiple upstream Internet service providers that provide full access to the public Internet. ERC does not make any distinction in its treatment of customer traffic based on application or content.

In some areas, ERC also provides other middle-mile services in an open, provider-neutral and non-discriminatory fashion. Any middle- or last-mile provider or wholesaler within the ERC service area is eligible to connect at reasonable rates and terms, at locations where services are available.
